# From Bur Exchanges UP-TO-DATE LENS GRINDING PLANT

TO PROPERLY CARE FOR THE OPTICAL BUSINESS OF SALINE COUNTY.

We are fully equipped to scientifically examine your eyes, make up complicated lenses and deliver them to you in a few hours time.

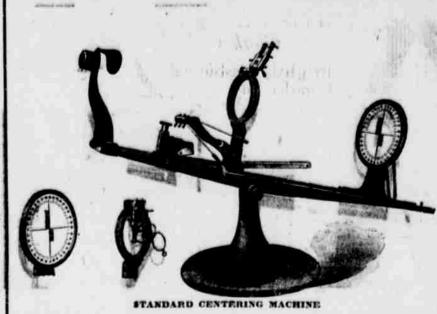

LENS' GRINDING BENCH equipped with two fine composition stones for grinding and edging, diamond pointed Lens drill and broach, diamond cutting ses are more expensive than the flat, but machine for cutting all size lenses, polishing and chuck head, operated by electric motor.

### Toric Lenses are Best for the Eyes.

The above cut illustrates the difference between the toric and the old style or flat lens You get perfect vision through the absolute center of a flat lens but in looking through the edges there is more distortion of the object looked at. The toric lens conforms to the shape of the eye ball, gives perfect vision at any angle you might look through it and more comfortable vision. Toric lenclearness of vision.

Imperfectly centered lenses are injurious to the eyes. With this centering machine it is impossible to grind lenses out of center. We can cheaper considering the added comfort and measure your old lenses or duplicate a broken lens with absolute accuracy. When you break a lens bring it to us.

Our Optical Department is in charge of W. A. Vawter, an Optic metric of ten years experience in Marshall. All eyes scientifically examined and satisfaction guaranteed. Our prices are moderate considering the services rendered. Mr. Vawter is permanently located and tries to give every patron such satisfaction that they will refer their friends to him. Come and see us.
